SUMMARY

Computer Science student pursuing a Bachelor's degree and aspiring Machine Learning Engineer with hands-on internship experience developing and evaluating predictive models. Proficient in Python, SQL, NumPy, Pandas, Scikit-Learn, and PyTorch, with a strong foundation in data preprocessing, feature engineering, and core ML algorithms. Proven track record of translating complex datasets into actionable solutions and optimizing performance metrics through structured project work.

EDUCATION

Bachelor of Technology (Bachelor's degree) in Computer Science and Engineering **08/2024 – Present | Gwalior, India**
Amity University Gwalior

SKILLS

Programming Languages
Python, C++, SQL

ML Libraries
Scikit-learn, Pandas, NumPy, XGBoost, Matplotlib, TensorFlow, Keras

Tools
Jupyter Notebook, Git, GitHub, Streamlit, Anaconda

Data Structures & Algorithms
Arrays, Linked Lists, Stacks, Queues, Trees, Sorting and Searching Algorithms

Machine Learning
Supervised Learning, Classification, Regression, Model Evaluation, Feature Engineering, Random Forest, XGBoost

Computer Vision
OpenCV, face_recognition, Image Processing

Data Analysis
Data Cleaning, Data Preprocessing, EDA

PROJECTS

Face Recognition Based Attendance System **06/2026 – 07/2026**
Python | OpenCV | face_recognition | NumPy | Computer Vision
- Built a face recognition-based attendance system using OpenCV and face recognition.
- Automated attendance logging into SQL database in real-time, reducing manual entry time by 80%.
- Enhanced face detection accuracy by 12% across 200+ test images using CLAHE image preprocessing.
- Reduced manual effort and ensured secure attendance tracking.

Intelligent Tutoring System (AI-based Learning Platform) **02/2026 – 04/2026**
Python | Machine Learning | NLP | Pandas | AI in Education
- Developed an AI-based Intelligent Tutoring System for personalized learning.
- Built NLP-based classification models using Scikit-Learn to dynamically adjust difficulty based on student quiz performance.
- Used data analysis techniques to track and improve learning outcomes.
- Designed a user-friendly interface for interactive learning.
- Deployed an interactive NLP classification model using PyTorch/TensorFlow and Streamlit to dynamically adjust quiz difficulty.

PROFESSIONAL EXPERIENCE

Machine Learning Intern, Codtech IT Solutions Private Limited **07/2026 – 08/2026 | Remote**
- Developed and evaluated Machine Learning algorithms using Python and Scikit-Learn.
- Performed data preprocessing and feature selection on 10,000+ data points, boosting model accuracy by 15%.
- Trained and evaluated Random Forest and XGBoost models on real-world datasets, achieving an 88% average F1-score.

Machine Learning Intern, Syntexhub **07/2026 – 08/2026 | Remote**
- Implemented predictive machine learning models across 5+ datasets, conducting EDA with Pandas and NumPy to identify key features.
- Optimized hyperparameters via GridSearchCV, improving model stability and performance by 10%.

- Collaborated on data pipelines and pipeline validation for machine learning workflows.
